# NC CPRG Statewide Implementation Grant Snapshot

**Total Budget - $199.9 million**

## Transportation $65 million

Program #1: RFPs for the replacement of vehicles (government, non-government, and fleet) to cleaner vehicles with an emphasis on vehicle electrification, and RFPs for Level 2 changing infrastructure at multi-unit dwellings and publicly accessible charging.

Program #2: Significantly increase efficiency of freight container shipping system to reduce GHG emissions and foster many other benefits.

Program #3: Fund bicycle/pedestrian infrastructure projects and regional/local planning efforts that support the adoption of VMT reduction measures by local businesses and other organizations.

## Buildings $60 million

Program #1: Something Old is New Again: Harnessing the Power of the Weatherization Assistance Program + (WAP+).

Program #2: Appreciating Our Treasures: Electrifying and Creating Energy Efficiency in North Carolina's State-owned Buildings, Community Colleges and UNC System campuses.

Program #3: Energy Efficiency for Local Government Buildings in North Carolina.

## Industry $15 million

Program #1: Provide energy assessments and technical assistance.

Program #2: Establish workforce training & continuing education support programs.

Program #3: Establish an energy loan financing program.

## Waste $15 million

Program #1: RFP for approaches to divert organics from landfills by directing food to communities in need, and creating organic resources through composting or digestion.

Program #2: RFP for conversion of diesel refuse trucks to electric motors or lower-carbon fuels.

Program #3: RFP for projects that reduce landfill gas emissions through improved landfill operations to collect gas more efficiently and earlier in a landfill life.

## Central Pines COG (Raleigh-Durham area) — $15.4 million

**Buildings**
Project #1: Regional Efficiency for Homes and Buildings Program
**Transportation**
Project #2: A Systems approach to reducing VMT's while enhancing mobility access.

## Centralina COG (Charlotte area) — $19.6 million

**Buildings**
Project #1: Site-specific program to decarbonize industrial buildings.
Project #2: Support programs to increase energy efficiency in multi-unit residential buildings housing elderly, disabled adults and veterans.
**Transportation**
Project #1: Regional VMT reduction through transportation demand management, transit system coordination, incentives, and LIDAC micromobility.

**Administrative Costs at 5% - Total of $10 million**
